C1R20

Dosing System

dosiper

DESCRIPTION

Single pump is a dishwashing dosing equipment for detergent and rinse aid.

GENERAL FEATURES

The pump is highly chemically resistant since it's made of polypropylene and the product

is in contact only with the peristaltic tube.

The equipment must be connected to the solenoid valves of the dishwasher in order to dose during filling and rinsing cycle.

You can easily attach the pump to the wall by using either the 2 screws or the special bracket both included in the installation kit.

TECHNICAL FEATURES

Model	Flow Rate (l/h)	Tube (mm)	Consumption (watts)
C1R20	20	6x10	10W

POWER SUPPLY: 230 Vac 50/60 Hz

IP Code: IP65

DIMENSIONS: 200mm x 102mm x 128mm; Weight: 0.75 g

INSTALLATION KIT

Suction and injection tube

Filter

Valve

Material for mounting and solenoid valves connection
