

# DATA SHEET

## ECODOT SERIES

Dosing System for one Washer Extractor

**dosiper**

## DESCRIPTION

ECODOT equipments are dosing systems with microprocessor designed to work in relay mode. You have the option to install a flushing manifold.

## GENERAL FEATURES

Flushing time adjustable.

Up to 4 dosing pumps.

Possibility to connect the equipment to an alarm system to detect the lack of product and block the pump to avoid the loss of prime.

## TECHNICAL FEATURES

IP Code: IP65

Power Supply: 220 VCA  $\pm 10 \%$ ; 50/60 Hz

Model	Flow Rate (l/h )	Consumption (watts)
ECODOT	20	40W

\*Peristaltic tube depending on customer needs.

4 input signals to control dosing pumps.

Configurable input signals voltage: 24VAC – 230VAC.

Flushing time configuration through potentiometer.

Flushing manifold activation: during or after dosage.
